

TECHNICAL DATA SHEET

Big 6 Profile Sheet

TufLite Corrugated roofing sheets embody superior performance with exemplary impact resistivity.

These sheets are deemed fit for commercial establishments, industrial applications, residential areas and warehouses.

The profiled sheets are manufactured with precise specifications to find an apt use in industrial roof illumination and daylight cladding. The use of Corrugated sheets is greatly beneficial in enhancing daylight harvesting.

The increasing concerns for environmental issues validate the use of such non-conventional products that can deliver results in terms of energy saving through daylight harvesting.

SHEET THICKNESS	0.8 –2.0mm
SHEET WIDTH	920mm
WORKING WIDTH	875mm
PITCH	178mm
HEIGHT	51mm
SHEET LENGTH	Tailored
LIGHT TRANSMISSION	CLEAR - 90%
MAX. SERVICE TEMPERATURE	120°C
