

TECHNICAL DATA SHEET

Greca 200/35 Profile Sheet

TufLite Corrugated roofing sheets embody superior performance with exemplary impact resistivity.

These sheets are deemed fit for commercial establishments, industrial applications, residential areas and warehouses.

The profiled sheets are manufactured with precise specifications to find an apt use in industrial roof illumination and daylight cladding. The use of Corrugated sheets is greatly beneficial in enhancing daylight harvesting.

The increasing concerns for environmental issues validate the use of such non-conventional products that can deliver results in terms of energy saving through daylight harvesting.

SHEET THICKNESS	1.6 –2.0mm
SHEET WIDTH	1060mm
WORKING WIDTH	1000mm
PITCH	200mm
HEIGHT	35mm
SHEET LENGTH	Tailored
LIGHT TRANSMISSION	CLEAR - 90%
MAX. SERVICE TEMPERATURE	120°C
